DETAILED ACTION

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim1-12, drawn to a method and a computer readable medium directed to selecting web objects fro a server based upon receiving a data set from a microbrowser and transmitting the selected web objects to the microbrowser, classified in class 709, subclass 246.
 - II. Claims 13-21, drawn to an article of manufacture including a dynamic browser governor and a dynamic serving governor to send and receive an Advertisement Configuration Data set, classified in class 709, subclass 246.
 - III. Claims 22-27, drawn to a method for preserving a battery life in a networked client device, classified in class 455, subclass 343.2 0r 574.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as comprising an Advertisement Configuration Data (ACD) set and the same is not required for Invention I. See MPEP § 806.05(d).

Inventions III and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as preserving the battery life and the same is not required for Invention II. See MPEP § 806.05(d).

Page 3

Inventions III and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as preserving battery life and the same is not required for Invention II. See MPEP § 806.05(d).

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the search required for Group III is not required for Group II, search required for group II is not required for Group I, and have acquired a separate status in the art because of their recognized divergent subject matter restriction for examination purposes as indicated is proper.
- 4. A telephone call was made to attorney Mr. Robert Frantz on 12/10/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yogesh C Garg whose telephone number is 703-306-0252. The examiner can normally be reached on M-F(8:30-4:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wynn Coggins can be reached on 703-308-1344. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should
